Objectives and Investment Policy

Objective: Seeks to provide a high level of current income over the recommended holding period.

Portfolio securities: The Sub-Fund invests at least 80% of its assets in bonds, including mortgage-related and asset-backed securities. These investments may be from anywhere in the world, including emerging markets, and may be denominated in any currency. The Sub-Fund may invest up to 70% of its assets in below-investment grade bonds, up to 20% in bonds rated below CCC by Standard & Poor or considered to be of comparable quality by the Management Company, up to 30% in convertible securities and, on an ancillary basis, in equities. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure to various assets, markets or income streams.

Risk and Reward Profile

Lower Risk (not-risk free)
Lower Potential Reward

Higher Risk
Higher Potential Reward

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the risk profile of the mix of asset classes in which it invests. For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Additional key risks:

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

Credit risk: The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due. Higher yielding bonds may carry greater credit risk.

Liquidity risk: In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.

Operational risk: Losses may occur due to human error or omission, process errors, system disruptions or external events.

Derivatives risk: Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.

Emerging market risk: Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
